

Dualit®

Coffee grinder

Dualit's conical burr coffee grinder produces consistent ground coffee and preserves the maximum aroma of the bean, to provide you with the perfect cup of coffee every time.

Conical burr grinder:

Its powerful motor and gear reduction allows for a slower, cooler grind to produce consistently ground coffee with maximum aroma

Portion control:

Convenient dosing selector delivers only what you require each time, ensuring your beans are always freshly ground

Ten grind settings:

Covers all your coffee equipment needs, whether coarse (for percolators and cafetieres), medium (for filter machines) or fine (for espresso makers)

Removable burrs:

Burrs are easily removed for quick, convenient cleaning – an important factor in preserving flavour when changing between different beans

Large hopper:

A 250g hopper holds enough beans to grind up to 35 portions without refilling
