

Espresseria Automatic Premium EA8261PN

Die cast/black

- Innovative Technology in new design
- Full automatic espresso machine with exclusive die cast aluminum front
- Compact design
 - Measurements 365 x 330 x 245 mm
- Big electronic display
- Easy to operate with just one knob
- Krups patented Compact Thermoblock System (CTS)
 - Integrated percolation chamber and hydraulic jack in one compact block
- Variable capacity of 6 g to 9 g ground coffee in the percolation chamber
- 15 bar pump pressure
- Selection of mild or strong coffee/espresso
- CappuccinoPlus-milk frother
- Indirect cup warming plate
- Adjustable height of the Coffee Dispenser 57 - 94 mm
- Steam and hot water function
- Integrated coffee grinder with 3 levels of fineness
- Transparent beans container with hermetic seal, capacity of 275g
- Claris Aqua filter system
- Automatic cleaning and descaling programs
- Removable coffee cake container
- Removable 1,8 L water tank with integrated handle
- Removable coffee clean-trap, protecting the percolation chamber
- Including XL2000 Milk Frother and water filter
- Short instruction booklet integrated on the left hand side
- 1450 watt

Perfect Coffee System

- Compact Thermoblock
- Freshly ground coffee beans
- Metal conical burr grinder
- Water temperature
- Claris Aqua Filter System

Compact Thermoblock System (CTS)
Patented Stainless Steel Thermoblock for hot coffee right from the very first cup.

Coffee just how you like it.
Choose the coffee strength, water quantity and temperature to suit your preferences.

Temperature
For perfect coffee extraction, it is essential to have water at the right temperature. If the temperature is too low, your coffee tastes insipid and weak. So on the new EA8200 and EA8000 series, there are three levels for individually adjustable water temperature.

Metal conical burr grinder
The right degree of grinding is crucial to ensure a perfect coffee. The new high-quality metal conical burr grinder can be individually adjusted to suit your coffee's roasting level and your taste.

Water filter
Freshly filtered water with every coffee. That way you get ph-neutral water, enabling you to enjoy your coffee to the full.
