## CLASSE 6 E / E COMPACT

# Easy technology

The Classe 6 E version has electronic control and automatic dosing, ensuring constant and uniform performance. All versions of the Classe 6 feature a special tray to collect liquids, with one of the highest holding capacities available on the market.

**1 C-LEVER** (Rancilio Patent) The new steam valve with a special control knob and ergonomic design is complete with open-stay and open-close functions. The valve has a very short travel distance, and is operated by rotating it just 25°. Turning it upwards, it opens and remains in this position. Turned downwards, it automatically closes when released. Rapidity, precision and ergonomics: maximum user comfort for daily work.

**V-FLEX** is a self-adapting system that harmonizes the operating voltage of the machine with voltage variations in the main power supply. V-flex avoids installation errors and eliminates the fluctuation in the supplied voltage. Machines fitted with V-flex also have an advanced diagnostics function called Easy-Fix, which allows a technician to immediately trace any technical problems and solve them easily.

**COMPACT** [only for 2G] The compact model, available with 2 groups, has the same potential, but in a smaller housing unit (570 mm), allowing it to be positioned even in restricted spaces.

**PLUG & BREW** (Rancilio Patent) Installing a Rancilio machine has never been quicker or easier. Dosages and the main functions of the machine can be programmed immediately. Even machines without a display feature allow you to adjust the temperature externally, thanks to a new function that allows boiler pressure to be varied from the control buttons. Standard on all new Classe 6 E versions.

## Technical Features

independent heat exchangers
electric heating
incorporated volumetric pump
boiler pressure gauge
automatic water level control
reduction to 2/3 of maximum power
electronic boiler temperature/pressure control
housing in stainless steel

## Endowments, accessories

**ENDOWMENTS:** 1 filter holder for 2 cups per group, 1 filter holder for 1 cup, 2 steam wands, 1 hot water dispenser programmable for dosage time, coffee tamper, measuring scoop and washing disks, foot extensions.
